DETAILED ACTION

In view of the Appeal brief filed on 11/22/2006, PROSECUTION IS HEREBY REOPENED. A new ground of rejection is set forth below.

To avoid abandonment of the application, appellant must exercise one of the following two options:

(1) file a reply under 37 CFR 1.111 (if this Office action is non-final) or a reply under 37 CFR 1.113 (if this Office action is final); or,

(2) initiate a new appeal by filing a notice of appeal under 37 CFR 41.31 followed by an appeal brief under 37 CFR 41.37. The previously paid notice of appeal fee and appeal brief fee can be applied to the new appeal. If, however, the appeal fees set forth in 37 CFR 41.20 have been increased since they were previously paid, then appellant must pay the difference between the increased fees and the amount previously paid.

A Supervisory Patent Examiner (SPE) has approved of reopening prosecution by signing below:

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re*

Art Unit: 1657

Goodman, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 11, 12, 14-27 and 29-32 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 6, 8 and 9 of U.S. Patent No. 7,022,338 (Cedgard).

Although the conflicting claims are not identical, they are not patentably distinct from each other because they are directed to the similar methods for the production of tablets with live bacteria by pressing a mixture comprising live bacteria and an oligosaccharide or inulin to form the tablet. The instant claims are broader than the issued claims since the issued claims require incorporation of an additional component such as a slime-forming agent (issued claim 6) before the pressing step that is not necessary required by the instant claims. The instant claims are narrower because they are directed to making tablets with bacteria (claim 11) or lactic acid bacteria (claims 16, 22 and 27). However, the microorganisms in the method of making tablets of the issued patent as disclosed therein are the same bacteria as encompassed by the instant claims, for example: see US 7,022,338 at col. 3, lines 30-35.

Accordingly, the claimed processes in the issued patent and in the present application are obvious variants.

Therefore, the inventions as claimed are co-extensive.
